Big Brand THEORY

PAID MEDIA

PORTFOLIO

Helping businesses build scalable customer acquisition systems through Meta and Google Ads

BRIEF PROFILE

PAID MEDIA SPECIALIST

ABOUT

Hi! I'm Chanel Xaba, a Paid Media Manager with 7.5 years' experience in the digital space - 5 years in agency environments, including Ogilvy, and 2.5 years running an independent consultancy where I help businesses build scalable customer acquisition through paid media strategy.

I've independently managed accounts in SA, US and the UK markets for lead generation and e-commerce businesses across multiple industries.

CORE EXPERTISE

- Conversion Tracking (Meta API/CAPI, Google Analytics, Google Tag Manager, Offline conversions integration where necessary)
- Paid Media Strategy
- Campaign management (Meta, Google Ads and Programmatic Platforms - DV360 & CM360)

QUICK WINS FRAMEWORK

A performance audit run in the first days of every engagement (tracking, budget allocation, creative, offer, messaging, CRO optimisation recommendations) that surfaces immediate optimisations I can implement before any strategic pause in performance.

PERSONA-BASED CREATIVE FRAMEWORK

A system for creative diversification that moves through macro persona, micro persona, pain point, funnel stage, angle, and creative execution (type, hook, format), so messaging stays relevant without multiplying production cost.

LEAD GENERATION

CASE STUDIES

META ADS - LEAD GENERATION CAMPAIGN

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The client wanted to increase leads for **Psychology**, **Social Work** and **Education** programmes while reducing cost per lead without increasing media spend.

Diagnosis

A review of the previous three months of campaign performance identified two areas of improvement

- **Audience performance:** The 18–24 age group as the weakest-performing audience.
- **Lead form alignment:** A single lead form was being used across 3 programmes, creating an opportunity to better align messaging with each programmes lead form.

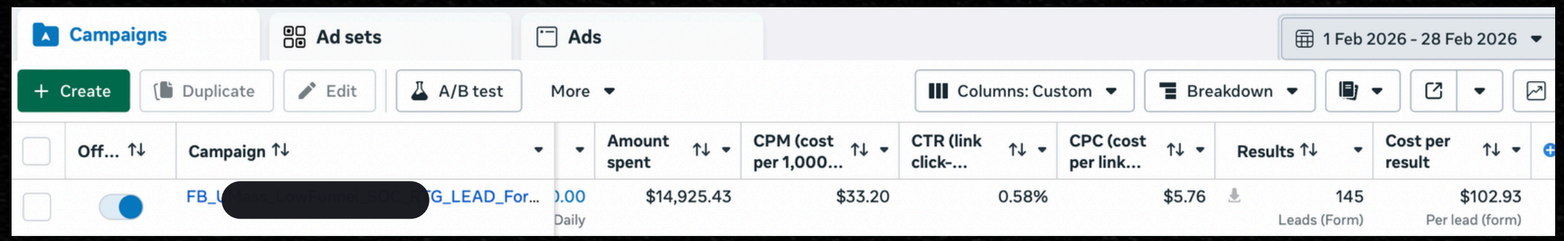

Strategy

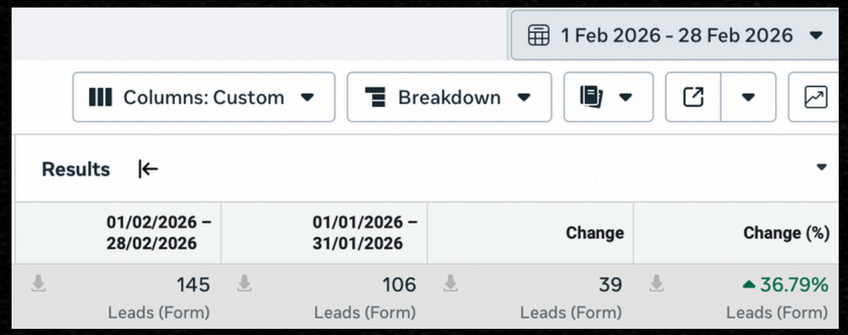

As part of my **Quick Wins framework**:

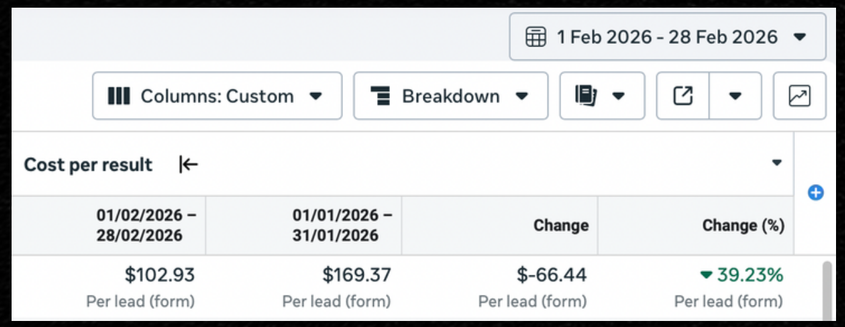

- Excluded the consistently underperforming 18-24 age group.
- Paused least best performing creatives
- Implemented additional high-impact optimisations identified during the audit.

RESULTS

Results

Following a performance audit of the previous 3 months, I implemented optimisations to address gaps in audience performance and lead generation.

- **Lead form alignment:** Previously we were using 1 lead form combining all programmes. I testing separate lead forms per programme to improve ad-to-form alignment and maintain consistent messaging from ad to lead submission.
- **Audience effeciency:** Paused the 18-24 age group that was spending budget but not showing good performance.
- **Creative Optimisation:** Paused weakest performing creatives.

↑ 36.79%

Leads

↑ 39.23%

CPL

Leads increased by 37% and CPL decreased by 39% in 1 month.

META ADS - LEAD GENERATION CAMPAIGN

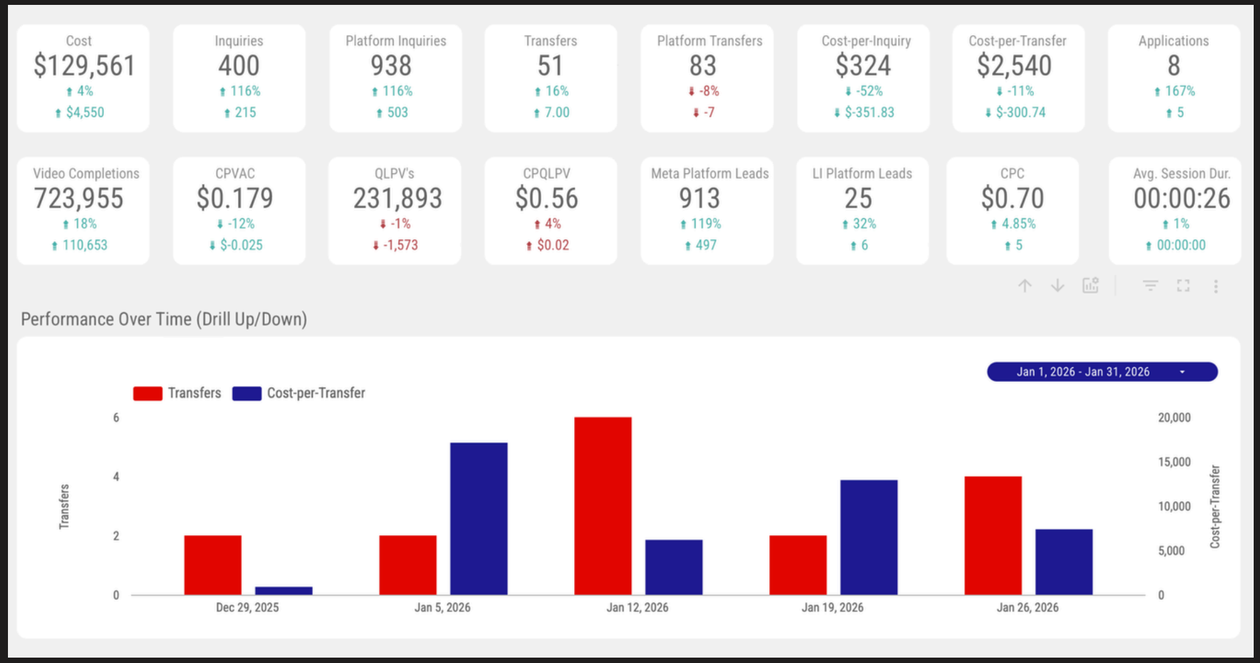

FROM LEAD GENERATION TO BUSINESS OUTCOMES

913 Meta platform leads
↑ 119% YoY

- **400 inquiries ↑ 116%**
- **51 transfers ↑ 16%**
- **8 applications ↑ 167%**
- **Cost per inquiry ↓ 52% to $324**
- **Cost per transfer ↓ 11% to $2,540**

Downstream metrics reflect combined campaign performance across paid social channels (Meta and LinkedIn)*

Meta generated substantially more platform leads while overall downstream outcomes improved.

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The client wanted to generate more qualified leads for their **bookkeeping, accounting and payroll services** through Google Ads. Although campaigns were generating enquiries, there was an opportunity to improve lead quality while making better use of the existing advertising budget.

Diagnosis

Leads were being captured via Google Forms and stored in Google Sheets, making lead management and reporting difficult as the business grew.

Strategy

- Implemented **conversion tracking** for lead forms per service. The leads tracked were **submitted lead forms.**
- **Expanded the** keyword strategy beyond phrase and exact match types to include branded. We avoided broad match to reduce wasted ad spend.
- Recommended a **CRM to improve lead management and reporting.**
- Refined the **lead form to improve lead quality.**

RESULTS

META ADS - LEAD GENERATION CAMPAIGN

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The **healthcare client** wanted to **increase qualified leads** while reducing the cost per booked member without increasing media spend.

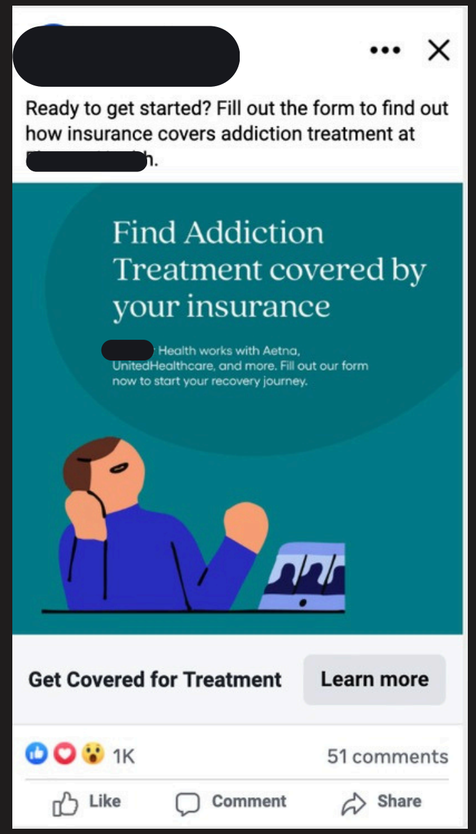

Diagnosis

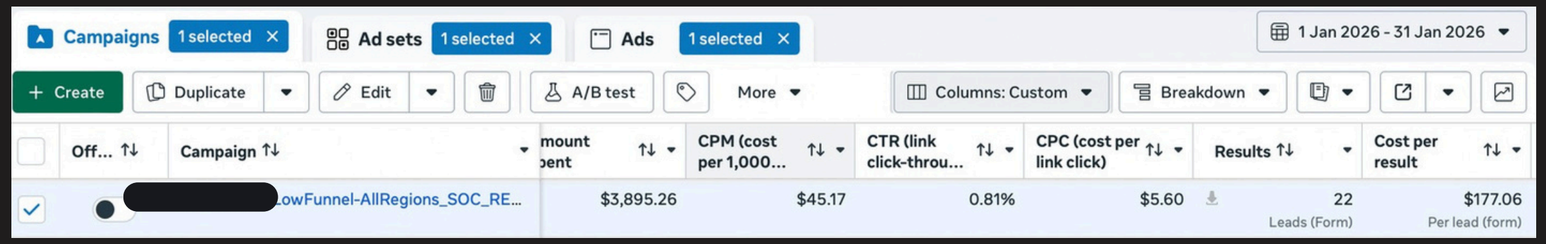

A performance audit identified several immediate optimisation opportunities that could improve campaign efficiency without requiring additional budget.

Strategy

As part of my onboarding process, I implement a series of Quick Wins. These are high-impact optimisations designed to deliver measurable improvements early in the engagement.

- Reallocated budget from underperforming age groups to higher-converting audiences.
- Introduced Google Display remarketing audiences into Meta to strengthen Meta's behavioural signals and help the algorithm identify higher-intent users.
- Implemented a structured creative testing framework, where insurance-focused messaging significantly outperformed alternative messaging.

E-COMMERCE

CASE STUDIES

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The objective was to drive high-intent cruise bookings through Google Ads while maintaining efficient cost/conversion and improving ROAS.

Diagnosis

Not all conversions represented the same level of booking intent, creating an opportunity to improve traffic quality and focus spend on higher-intent users.

Strategy

- Refined search targeting using high-performing queries and automated negative keyword optimisation.
- Excluded low-intent instant-form drop-offs.
- Aligned keywords, ad copy, and site extensions with search intent and key offers.
- Used impression share and lost impression share due to budget and rank to guide optimisation decisions.

Results

PPC delivered **957 bookings** across exact and phrase match campaigns while maintaining an effecient cost per conversion:

- **Exact match** delivered 548 bookings at R120.23 CPA.
- **Phrase match** delivered 409 bookings at R139.85 CPA.

Campaign	Cost	Avg. CPC	Cost / conv.	Bookings total	Conv. value	Search lost IS (budget)	Search lost IS (rank)	Bid strategy type

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The **traditional health and wellness client** wanted to increase revenue from their Meta campaigns while maintaining profitable customer acquisition.

Diagnosis

Customers were purchasing, but there was an opportunity to increase revenue by improving Average Order Value (AOV) and aligning spend with periods of higher purchase intent.

Strategy

- **Owned creative strategy** promoting product bundles and combo offers to **increase AOV**.
- **Increased budget around demand cycle periods**
- **Incorporated customer reviews in creative strategy** reducing friction in the purchase journey.

PROGRAMMATIC ADS

CASE STUDIES

CREATIVE BRIEF - PROGRAMMATIC DISPLAY CAMPAIGN

OBJECTIVE | DIAGNOSIS | STRATEGY | RESULTS

Objective

The client wanted to increase **app installs** through Display & Video 360 while maintaining efficient media spend.

Diagnosis

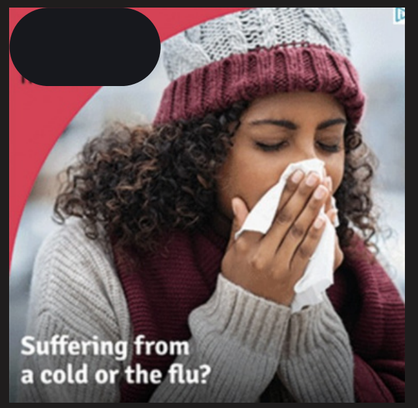

Campaign performance required ongoing optimisation to improve inventory quality, reduce invalid traffic and maximise app install performance.

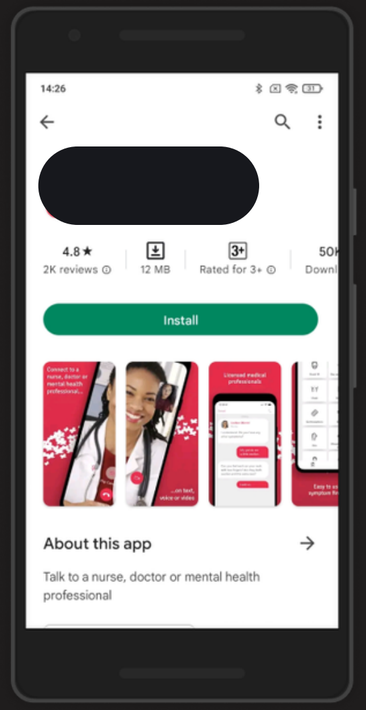

Strategy

- Optimised campaigns towards app installs across DV360.
- Reviewed inventory quality and placement performance to maximise exposure across relevant publishers while minimising invalid traffic.
- Monitored and optimised budget pacing to ensure media spend was delivered evenly throughout the campaign while maintaining performance.
- Continuously monitored campaign performance and implemented data-driven optimisations to improve efficiency.

RESULTS

31,283 CLICKS	R12.52 CPM	3,245 APP INSTALLS
R68.45 COST/INSTALL	R2.80 CPC

Creative management & QA system

I developed a centralised creative management and QA document to track client-delivered assets, draft ad copy, creative specifications, safe zone compliance and final QA

It gives the clients visibility into live ad placements through screenshot and links to final creative assets.
